## SPLIT ® SOLUTION

Every Heavy Duty Patio Umbrella is produced with a lifted valve, a small frame on top of the canopy that provides better resistance to sudden gusts of wind. In windy areas it is possible to apply the SPLIT ® SOLUTION construction technique, for larger models (4x4m and above). The SPLIT ® SOLUTION is a patented anti-wind system with six overlapping fabrics strips that help put an end to the 'sail effect' caused by wind against the canopy. The waterproof characteristics of the fabric of the umbrella remain but improved air circulation enhances the chill sensation during hot summer days. The sophisticated design gives the exclusive umbrellas a refined look and enhances their primary function as an essential accessory for the best outdoor spaces.

Svaki naš suncobran se pravi sa uzdignutim ventilom koji pojačava otpornost na iznenadne nalete vетра. Зајакнава ветроусталост сунцобрана. За ветровите зони, посебно кога се користе велики сунцобрани (4x4m и више), препоручујемо коришћење SPLIT ® SOLUTION система. SPLIT ® SOLUTION је техника конструкције анти-ветар сунцобрана чији су шест одвојених трака платна помажу у заустављању "ефекта једра" на површини сунцобрана. Непромочивост наших модела остаје непоменута, док циркулација ваздуха олакшава уživanje u Vašoj bašti tokom vrelih letnjih dana. Sofisticirani dizajn daje префинjeni изглед ексклузивним сунцобранима и претвара ih u nezamjenjiv dodatak Vašim outdoor prostorima.

## QUALITY

The quality of workmanship, sustained over two decades of experience and numerous projects, allows us to offer a one-year guarantee for all of our product components, if used in compliance with the Instructions for Use. We only propose the best EU outdoor fabrics'. Our Umbrellas can be crafted in Acrylic (100%) outdoor fabric (300gr/sq. m), Teflon treated (10 year warranty) or PVC Preconstraint 302 or 502 by Ferrari (100% waterproof, pre-tensioned). It is also possible to choose Soltis, a modern micro aired fabric, as an option. Please consult our Color Samples for more information on the range of fabrics we offer.

Kvalitet suncobrana iz naše ponude je rezultat iskustva od više od dve decenije i brojnih projekata. Svi naši proizvodi imaju garanciju od 1 godine, naravno uz poštovanje Priručnika za korišćenje koji prati svaki naš proizvod. Platna u našoj ponudi su outdoor platna najboljih EU proizvođača. Svaki suncobran može biti izrađen u: 100% Akrilno Outdoor platno, 300gr/kvm, tretirano teflonom, 10 godina garancije, ili PVC Preconstraint by Ferrari, 302 ili 502, 100% nepromociv, pre-tensioniran. Moguce je naruciti kao dodatak i moderno mikro-izbuseno platno Soltis Air Ferrari. Za dodatne informacije i tehničke karakteristike mozete konsultovati nasu Kartu Boja.

## WORKMANSHIP

11

All our umbrellas have a concrete base, and if desired, we can also make slabs for burying in concrete, wall brackets, and personalized solutions are possible. For the solid supports of our side umbrellas, we offer exclusively IROCO wood of African origin, characterized by both expressed robustness and durability, as well as irresistible aesthetic appeal. We also offer on the same models the possibility of making a supporting column from steel profile, galvanized and plasticized in the desired color. Umbrella poles (slats) are made of either reinforced aluminum profile or American oak. Aluminum slats can be painted in steel on request. Each strip that carries the canvas is fastened with stainless steel screws to ensure maximum durability and allow for easier replacement. All steel parts are galvanized and plasticized in the furnace in the desired color. Bases can be cement, steel, attached to the ground or wall.

Svi naši suncobrani imaju betonsko postolje, a po želji radimo i ploče za ukopavanje u beton, zidne nosače, a moguća su i personalizovana rešenja. Za čvrste nosače naših bočnih suncobrana nudimo isključivo IROKO drvo afričkog porekla, odlikovano kako iskazanom robusnosti i trajnosti tako i neodoljivom estetskom privlačnošću. Nudimo takođe na istim modelima mogućnost izrade nosećeg stuba od čeličnog profila, cinkovanog i plastificiranog u željenoj boji. Šteke (letve) suncobrana su izrađene ili od pojačanog aluminijumskog profila ili od američkog hrasta. Aluminijumske letve moguće je, po narudžbini, farbati u boji čelika. Svaka letva koja nosi platno je pričvršćena šrafovima od nerđajućeg čelika da bi osigurali maksimalnu izdržljivost i omogućili lakšu zamenu. Svi čelični delovi su su cinkovani i plastificirani u peći u željenoj boji. Baze mogu biti cementne, čelične, pričvršćene za tlo ili zid.

## CUSTOMIZATION

Every our patio umbrella is hand crafted on request and therefore it is possible to customize every single component of our exclusive patio umbrellas. On request, we can construct triangular, trapezoidal, special dimension umbrellas and many other customized solutions! Our 20 years of experience combined with modern 3D projection service are at your disposal to follow your desires and needs and to create a unique umbrella for your garden! Our aim to offer the widest range of outdoor umbrellas has led us to our new stainless steel line of umbrellas. These umbrellas are created to withstand the challenges of usage on the open sea and are intended for yachts and super yachts. The stainless steel line of umbrellas is crafted entirely in mirror polished AISI 316 stainless steel. This year we also introduced the new double layer Split Solution umbrellas. Double fabric strips enhance the sensation of freshness and open up new design frontiers for our exclusive Heavy Duty Patio Umbrellas.

Svaki suncobran se radi po narudžbini i moguće je personalizovati svaki detalj naših modela. Po želji pravimo trougle, trapezoidalne, suncobrane posebnih dimenzija i mnoga druga personalizovana rešenja. Proizvođač stavlja na raspolaganje 30 godina iskustva zajedno sa modernim 3D projektnim birom, kako bi pratili svaku Vašu želju i potrebu, i napravili jedinstveni suncobran za Vašu baštu. Naša želja da ponudimo najširi spektar baštenskih suncobrana dovela nas je do nove linije Stainless Steel suncobrana. Ovi suncobrani su napravljeni da izdrže izazove korišćenja na otvorenom moru i projektovani su za montažu na jahte i superjahte. Cela konstrukcija je izrađena od ispoliranog AISI 316 nerđajućeg čelika. Od ove godine takođe su u ponudi i suncobrani Split Solution sa duplim platnom, koje povećava osećaj svežine u toplim letnjim mesecima i otvara nove granice za dizajn naših ekskluzivnih velikih baštenskih suncobrana.

## Big Friend

Central Pole Umbrellas

Standard

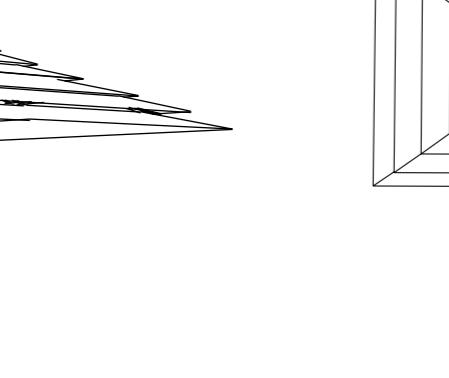

Optional

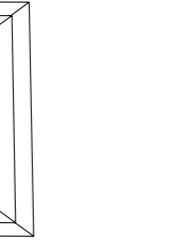

The Big Friend is a classic central beam umbrella with updated features like its 12 reinforced aluminum splints and telescopic pole that allows it to open up to dimensions of 50 m<sup>2</sup> under a single umbrella canopy. The telescopic system allows umbrella opening/closing without removing the chairs and tables underneath. Every rib is crafted from reinforced aluminum.

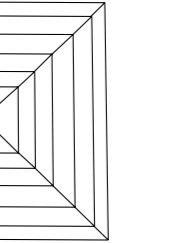

Big Friend je suncobran sa centralnim stubom velikih razmera. Teleskopski sistem u jakom čeličnom stubu dozvoljava otvaranje suncobrana bez potrebe za pomeranjem stolica i stolova u neposrednoj blizini. Velika površina do 50 m<sup>2</sup> je zaštićena od vremenskih uslova neuporedivo kvalitetnije i estetski privlačnije od tradicionalnih solucija sa mnoštvom malih reklamnih suncobrana. Sve letve su od pojačanog aluminijuma.

## Kite

Central Pole Umbrellas

The Kite sunshade is an innovation in the field of umbrellas, especially because of its unsurpassed strength and wind resistance characteristics. Kite umbrella can be used even in the most difficult weather conditions, from high mountainous areas with large amounts of snowfall to sea beaches where storms and storms can often make a real sweep and destroy traditional umbrellas that are not closed in time.

Suncobarn Kite je inovacija u polju suncobrana, zbog nenadmašivih karakteristika čvrstoće i otpornosti na vетар. Kite suncobran može biti korišćen i u najtežim vremenskim uslovima, od visokih planinskih predela sa velikim količinama snežnih padavina do morskih plaža gde bura i nevreme često znaju napraviti pravi pomet i uništiti tradicionalne suncobbrane koji ne budu zatvoreni na vreme.

# Ciak

Central Pole Umbrellas

Standard

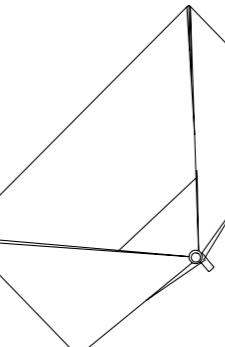

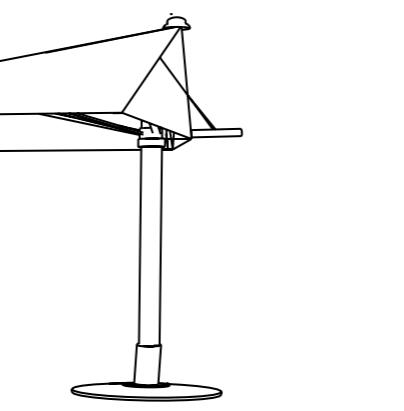

Optional

The Ciak umbrella is an exclusive model intended for narrow and long spaces that usually characterize the streets of old cities. Ciak gives you the opportunity to make full use of your space. With the smallest possible area occupied by the supporting pillar, it covers a wide space, offering the perfect solution for catering platforms and gardens up to 2.5 meters deep.

Ciak suncobran je ekskluzivni model namenjen za uske i dugačke prostore koji obično odlikuju ulice starih gradova. Ciak daje mogućnost punog korišćenja Vašeg prostora. Uz najmanju moguću površinu zauzetu nosećim stubom pokriva širok prostor, nudeći perfektno rešenje za ugostiteljske platforme i baštne dubine do 2,5 metara.

MISTER

## Arco

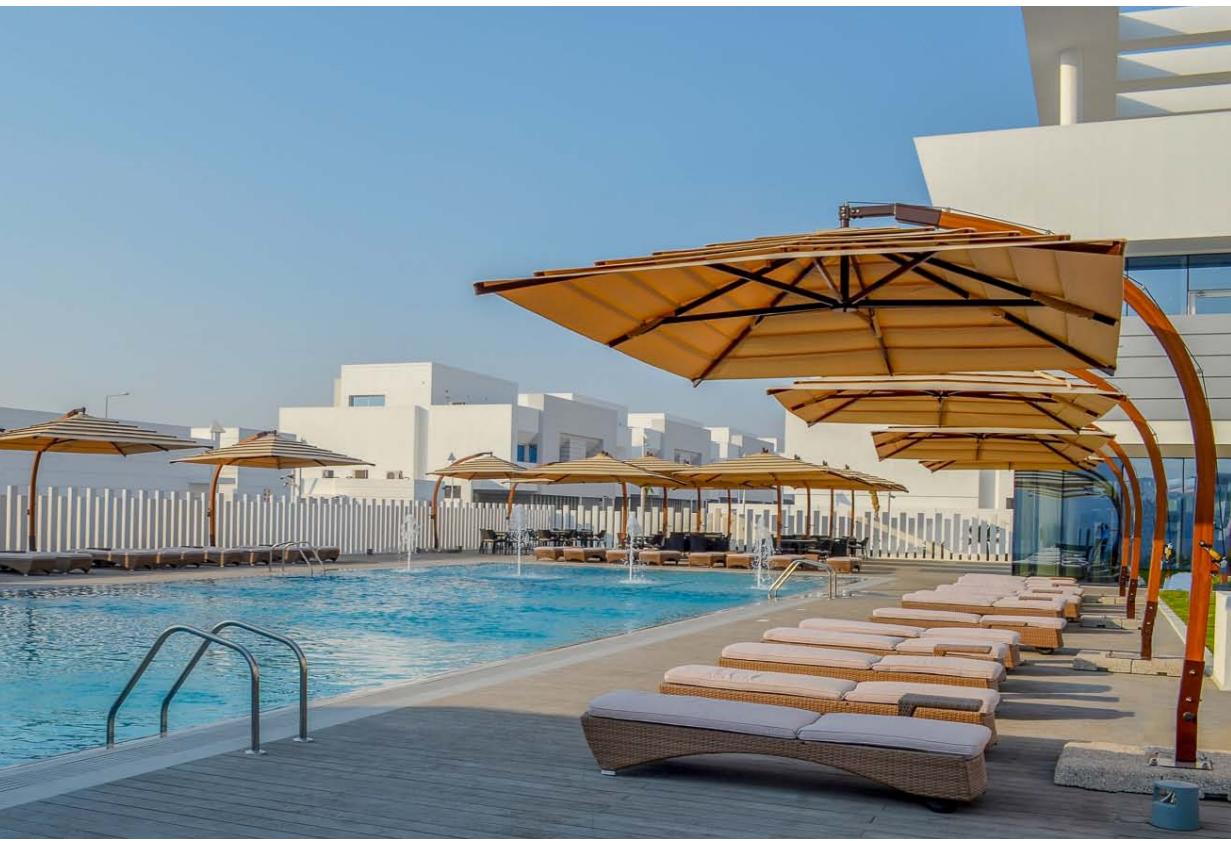

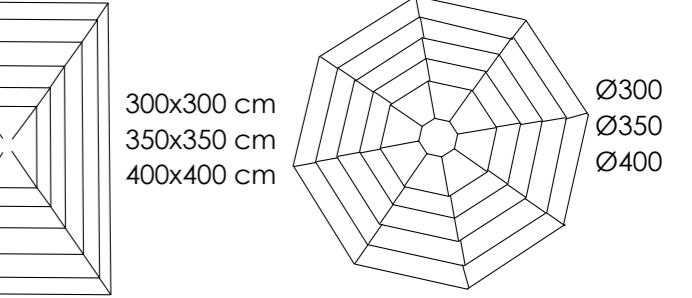

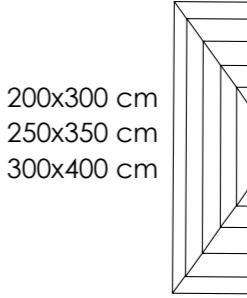

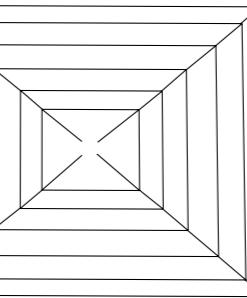

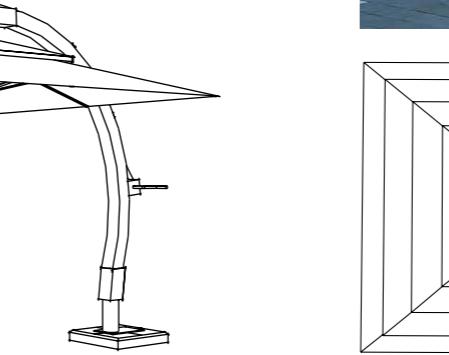

Offset Patio Umbrellas

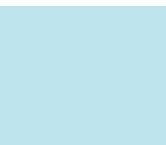

PVC 100%

The Arco is characterized by its departure from traditional portable joists. This model is an attractive refined solution that can cover large elegant spaces. Our expert craftsmen make the arch entirely from iroko wood and its lamellar construction ensures maximum reliability and durability. Every single component is designed to enhance its weather resistance, but without compromising its aesthetic features.

Arcov izvanredni dizajn proizlazi iz unikatnog nosećeg stuba izrađenog od iroko drveta, savijenog u luk u našim postrojenjima. Cela konstrukcija dizajnirana je tako da osigura dugogodišnju estetiku i funkcionalnost, a uzdignuti ventil štiti od iznenadnih naleta vетра. Za još bolju otpornost savetujemo naš patent Split Solution, koji uz prefinjeni izgled daje "odušak" vетру koji prolazi kroz 6 slojeva nepromočivog platna.

## Talento

Side Pole Umbrellas

Standard

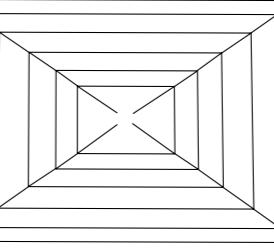

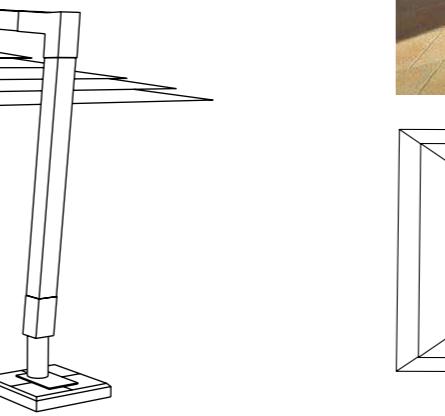

Optional

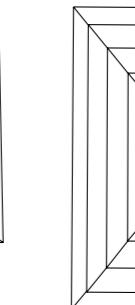

The Talento is a medium size umbrella with a lateral post. Thanks to its extreme versatility and ease of handling, it is suitable for both private and professional use. The vertical load bearing beam permits optimal usage of the area beneath, just as the possibility to rotate the base by 360° makes it possible to 'chase' the shade during the course of the day.

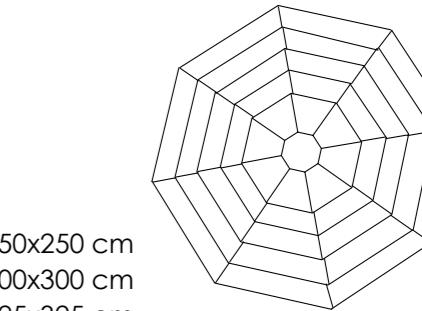

Talento je bočni suncobran srednje veličine. Zahvaljujući njegovoj pouzdanosti, lakoći korišćenja i prilagodljivosti, prigodan je kako za privatnu tako i profesionalnu upotrebu. Vertikalni bočni nosač omogućava optimalno korišćenje oslobađajući prostor ispod suncobra, a mogućnost rotiranja za 360 stepeni suncobra olakšava "traganje" za hladom tokom celog dana!

## Talento Steel

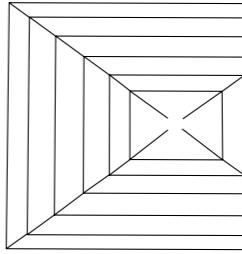

Side Pole Umbrellas

Talento Steel is an umbrella with a simple elegant design. Clean lines and 360° revolving design make it versatile and suitable for all environments. It is mostly requested for terraces and platforms, where the traditional concrete base would limit the useful ground space. The mirror polished stainless steel version is suitable for installation on luxury yachts and modern buildings.

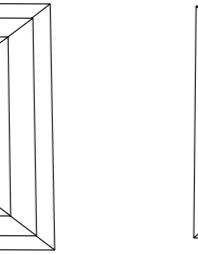

Talento Steel je suncobran sa čistim i jednostavnim dizajnom. Njegova minimalistička linija ga čini pogodnim za instaliranje u svaki prostor. Najčešća primena Talento Steel modela je na terasama ugostiteljskih objekata i privatnih kuća, gde bi standardna baza ometala u kretanju u ograničenom prostoru. Ovaj suncobran je razvijen i u Stainless Steel AISI 316 (ispolirani nerđajući čelik) verziji, pa je pogodan i za instaliranje na velikim jahtama, pogotovo sa sistemom antivetar Split Solution i inovativnim mikroizbušenim Soltis Air platnom.

## Gemelli Steel

Multiple Umbrellas

Standard

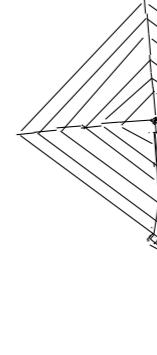

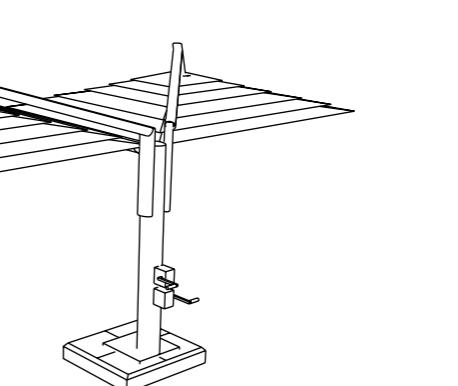

Optional

Gemelli Steel is part of the steel line and represents an evolution of the Gemelli Patio Umbrella. The two umbrellas can be oriented and moved when closed to 'follow' the shade during the day. The entire structure is made of thick galvanized steel and painted in the selected color. The Gemelli Steel has an innovative but simple design. The finely polished AISI 316 stainless steel version of this double patio umbrella is suitable for most exclusive modern environments and luxury yachts.

Gemelli Steel je deo Steel linije i predstavlja evoluciju Duplog Suncobrana Gemelli. Na ovom modelu 2 suncobrana, koja se mogu rotirati za 180 stepeni i ukloniti sa prohodnog prostora kada se ne koriste. Cela konstrukcija je napravljena inovativnim, a u isto vreme jednostavnim dizajnom. I ovaj suncobran, kao i svi suncobrani Steel linije, može se izraditi u Stainless Steel AISI 316 verziji (ispolirani nerđajući čelik), koji osigurava večnost i perfekciju u svim uslovima i savršeno se uklapa kako na moderne i ekskluzivne građevine tako i na velike i luksuzne jahte.

## Collage

Multiple Umbrellas

The Collage has four square canopies that each expand to 16.5ft and all together can cover an area of up to 1,089 square feet. The structure commands attention with the finest most sought after trims on the market today. The Collage is ideal for covering large square spaces and designed to prevent rainwater from seeping between the canopies by use of a special drip-guard linkage system.

Veliki Suncobran Collage ujedinjuje 4 pojedinačna suncobrana, veličine do 5 x 5 metara, u jedan ogromni suncobran na centralnom nosećem stubu, ukupne veličine do 10 x 10 metara. Njegova impozantna pojava i sofisticirani detalji čine od ovog suncobrana savršen proizvod za one koji žele pokriti velike kvadratne prostore, zaštićene od sunca i kiše, zahvaljujući sistemu povezivanja pojedinačnih suncobrana putem platnenih oluka.

# Fabrics Choice

## Optionals

The fabric is the most important part of any umbrella. This is why we offer only the best outdoor fabrics available on the market today.

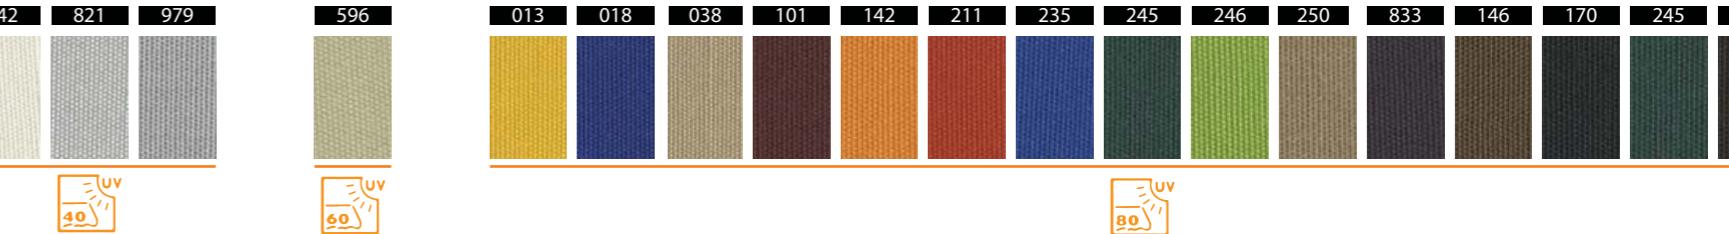

Platno je najbitniji deo svakog suncobrana. Zato nudimo samo najbolja platna za spoljašnju upotrebu.

ACRYLIC 100%, 300gr/sqm, made in Spain

Acrylic fabric (100%) is non-decomposable and anti bacterial with a 10 year warranty. The Teflon-treated fabric is water and dirt resistant.

Akrilno platno 100% anti-trulež i anti bakterijsko sa 10 godina garancije. Teflon premaz za vodootpornost i otpornost na prljavštinu.

PVC PRECONTRAIN, 590gr/sqm, made in France

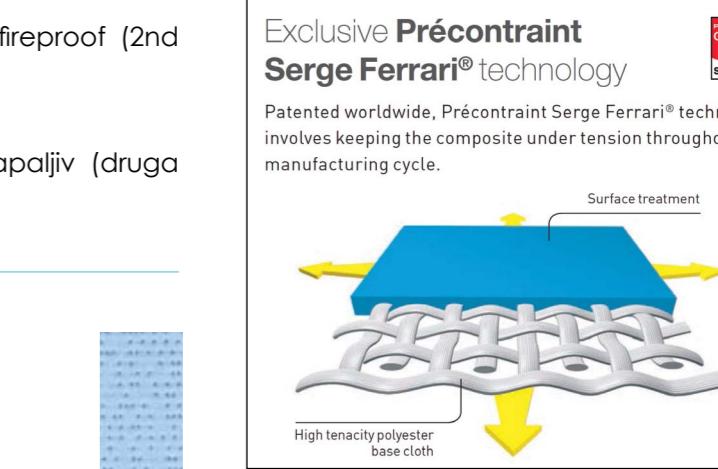

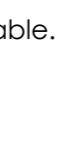

100% waterproof, pre-tensioned high dimensional stability, UV resistant, fireproof (2nd class), easy to maintain, durable and tear resistant.

100% nepromočiv, pre-tensioniran, visoka dimenzionalna stabilnost, nezapaljiv (druga klasa), lako održavanje, dugotrajan, otporan na cepanje.

MICRO AIRED SOLTIS, 400gr/sqm

Outward visibility, micro-ventilated, light, durable and 100% recyclable.

Providan, mikro ventilisan, lagan, dugotrajan, 100% reciklaža.

# Finishing

## Bordino / Ribbon / Obrubna traka

The final customization touch is the ribbon color, which is available in all listed fabric colors.

Zadnji dodir personalizacije je boja obrubne trake. Dostupna je u svim bojama platna.

## Parti in metallo / Metal parts / Metalni dijelovi:

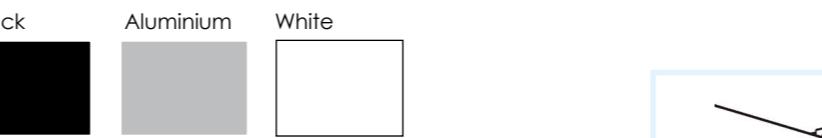

All metal parts are zinc plated and furnace painted in the following RAL colors (choice):

Svi metalni delovi su cinkovani i plastificirani u RAL boji po izboru:

## Stecche / Ribs/ Letve (20x40x2mm)

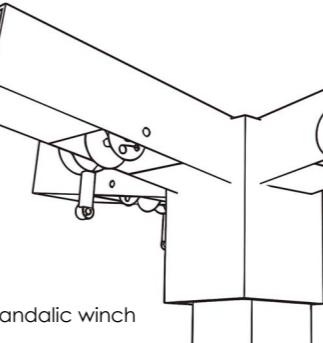

For all umbrellas up to 4x4 m with a Raised Valve the ribs can be wooden or aluminum. All larger umbrellas and Split Solution umbrellas have ribs that are made only of aluminum. The available colors are:

Svi suncobrani uzdignutog ventila do 4x4m veličine mogu biti sa aluminijskim ili drvenim letvama. Svi veći suncobrani i svi Split Solution suncobrani rade se isključivo od aluminijskih letvi. Boje se mogu birati između:

Our Heavy Duty Patio Umbrellas are constructed to protect from sun, and some of them also for rain protection. We advise to use our Patio Umbrellas only in conditions of normal weather. Union Drvo is not responsible for any damage derived from usage of our products in conditions of strong wind.

Naši baštenski suncobrani su projektovani za zaštitu od sunca, a neki i za zaštitu od kiše. Savetujemo korišćenje u normalnim vremenskim uslovima. Union Drvo doo ne preuzima odgovornost za eventualnu štetu nastalu korišćenjem suncobrana pri jakom vetrusu.
